Formatação de Texto

Texto exemplo:

Good programming is not learned from generalities, but by seeing how significant programs can be made clean, easy to read, easy to maintain and modify, human-engineered, efficient, and reliable, by the application of common sense and by the use of good programming practices.

Formatação de Texto

Formatação com linhas de comprimento 40:

Good programming is not learned from generalities, but by seeing how significant programs can be made clean, easy to read, easy to maintain and modify, human-engineered, efficient, and reliable, by the application of common sense and by the use of good programming practices.

Formatação de Texto

Em Haskell:

```
Main> putStr texto  
Good programming is not learned from  
generalities, but by seeing how significant  
programs can be made clean, easy to  
read, easy to maintain and modify,  
human-engineered, efficient, and reliable,  
by the application of common sense and  
by the use of good programming practices.
```

Onde `texto` é o texto original, a ser formatado.

Formatação de Texto

Em Haskell:

```
Main> putStr (formatar texto)
Good programming is not learned from
generalities, but by seeing how
significant programs can be made clean,
easy to read, easy to maintain and
modify, human-engineered, efficient, and
reliable, by the application of common
sense and by the use of good programming
practices.
```

Onde `texto` é o texto original, a ser formatado.

```
Main> splitwords texto  
["Good","programming","is","not","learned","from"
