Web Programming

Rodrigo Martins Pagliares

Web programming foundations

This **part** of the **course** provides a **10,000 feet overview** of a **web developer career**, focusing on the **methods, techniques, languages, development tools, libraries, frameworks and internetworking concepts** necessary to **grasp** in order to become a **Front-End developer**.

In **another part** of the **course**, we will **complement** this **topic** with a **deep investigation** of the **HTTP protocol** and its **headers**, fundamental **knowledge** for a **Back-End developer**.

Modules of this part of the course

1. The web development career
2. Development methods, processes, patterns and practices
3. Core network concepts
4. Core web languages
5. Document Object Model

The web development career

Development methods,
processes, patterns and practices

Core network concepts

Core web languages

The Document Object Model

Modules of this part of the course (cont.)

6. Writing, deploying, running and publishing websites.
7. Front-end development, tools, frameworks and libraries
8. Backend languages, APIs and services
9. Accessibility – make the web usable for everyone

Writing, deploying, running
and publishing websites

Front-end development tools,
frameworks & libraries

Back-end languages, APIs and
services

Accessibility – make the web
usable by everyone

Part of the
course

Source-code

I use **Visual Studio Code** for the **demonstrations** in the course. You can type `Cmd+O` (`Ctrl+O` on Windows) to **open the source-files**.

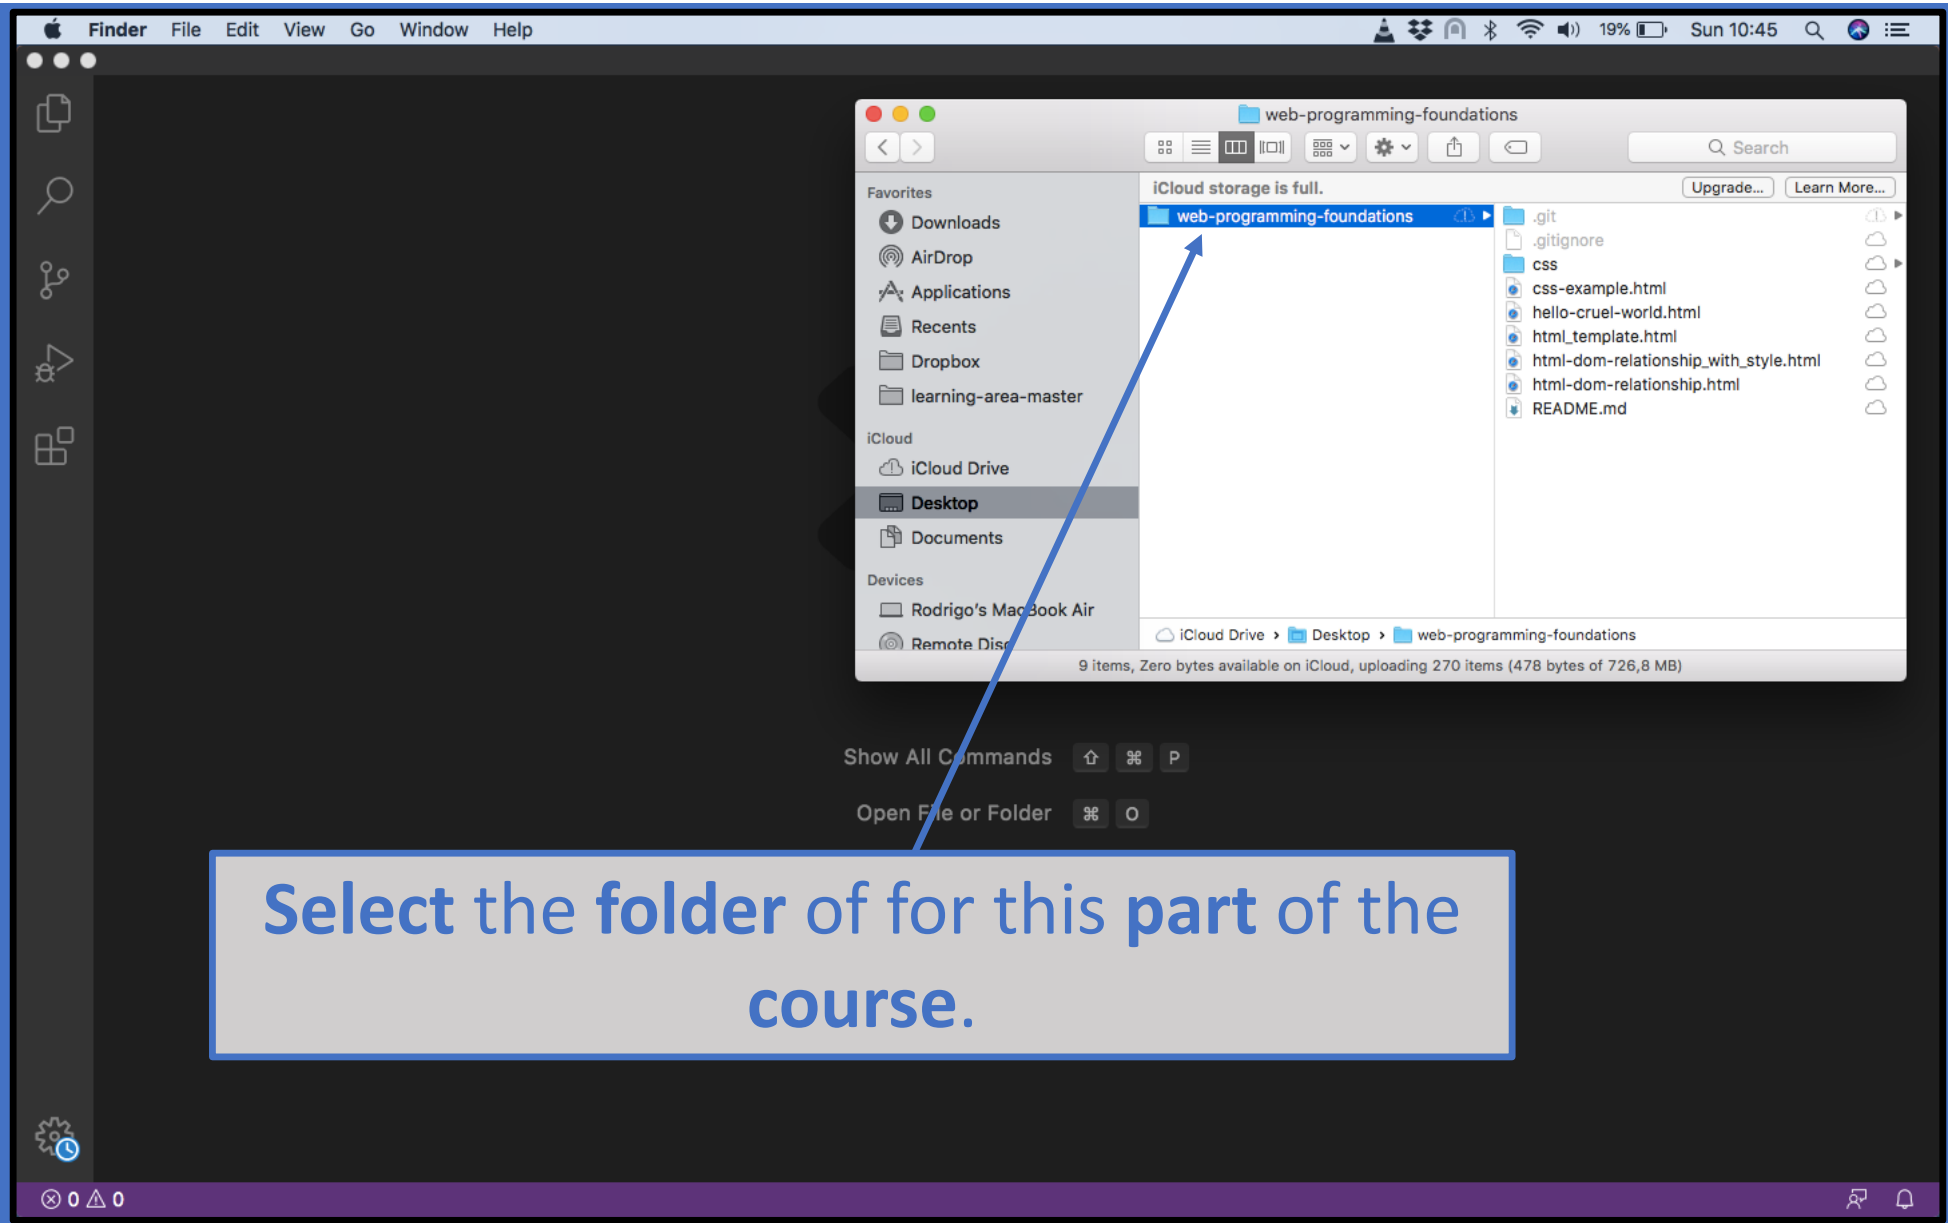

The screenshot shows the Visual Studio Code application window. The top menu bar includes 'Code', 'File', 'Edit', 'Selection', 'View', 'Go', 'Debug', 'Terminal', 'Window', and 'Help'. The status bar at the bottom shows '0 0 0' and a search icon. A semi-transparent text box in the center contains the text: 'I use Visual Studio Code for the demonstrations in the course. You can type Cmd+O (Ctrl+O on Windows) to open the source-files.' A blue arrow points from the word 'open' in this text to the 'Open File or Folder' option in the command palette. The command palette is open, displaying the following options: 'Show All Commands' (with keyboard shortcuts ⌘, ⌘, P), 'Open File or Folder' (with keyboard shortcuts ⌘, O), 'Open Recent' (with keyboard shortcuts ⌘, R), and 'New Untitled File' (with keyboard shortcuts ⌘, N). The background of the editor is dark, and the left sidebar shows icons for Explorer, Search, Source Control, Run and Debug, and Extensions.

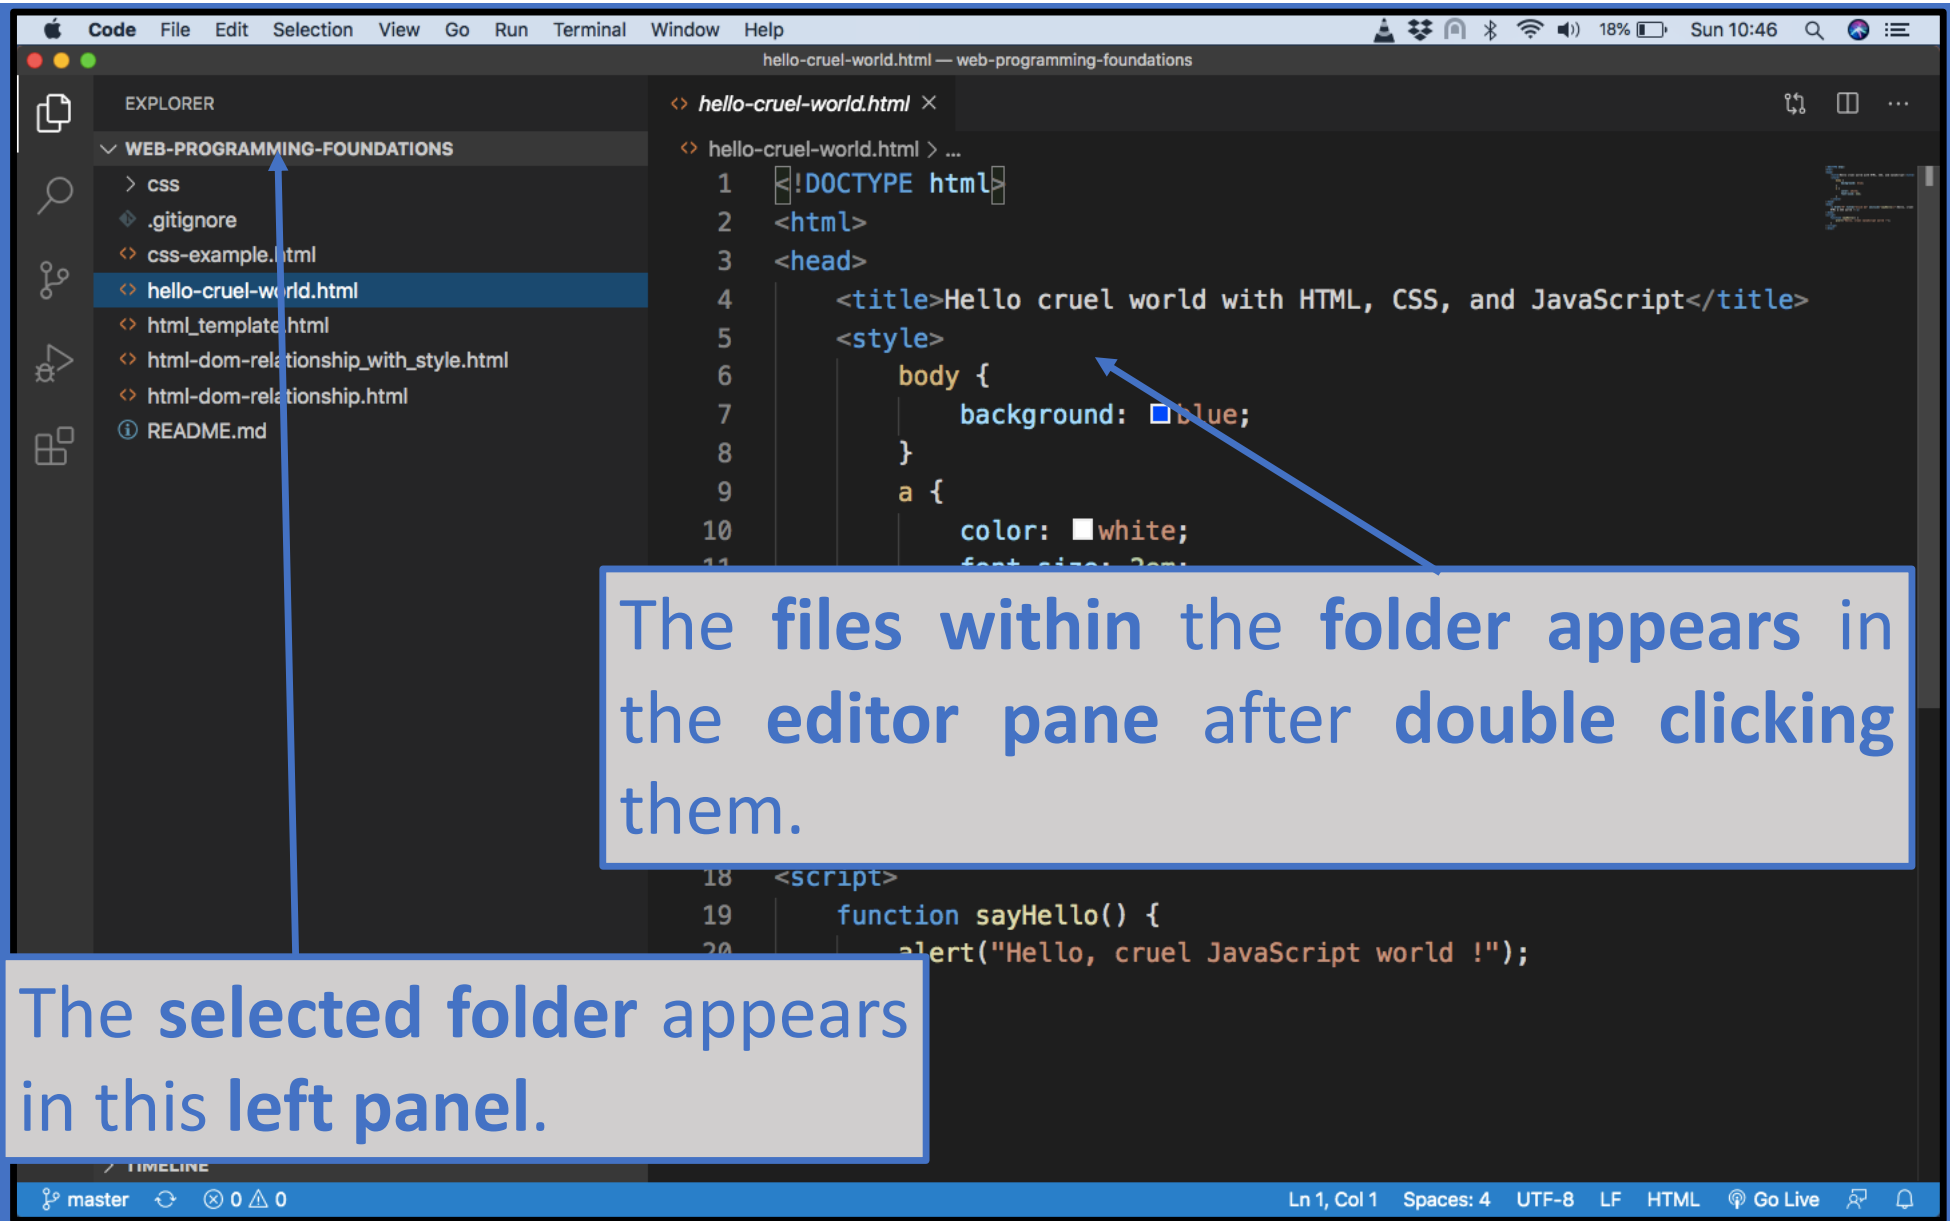

Show All Commands ⌘ ⌘ P

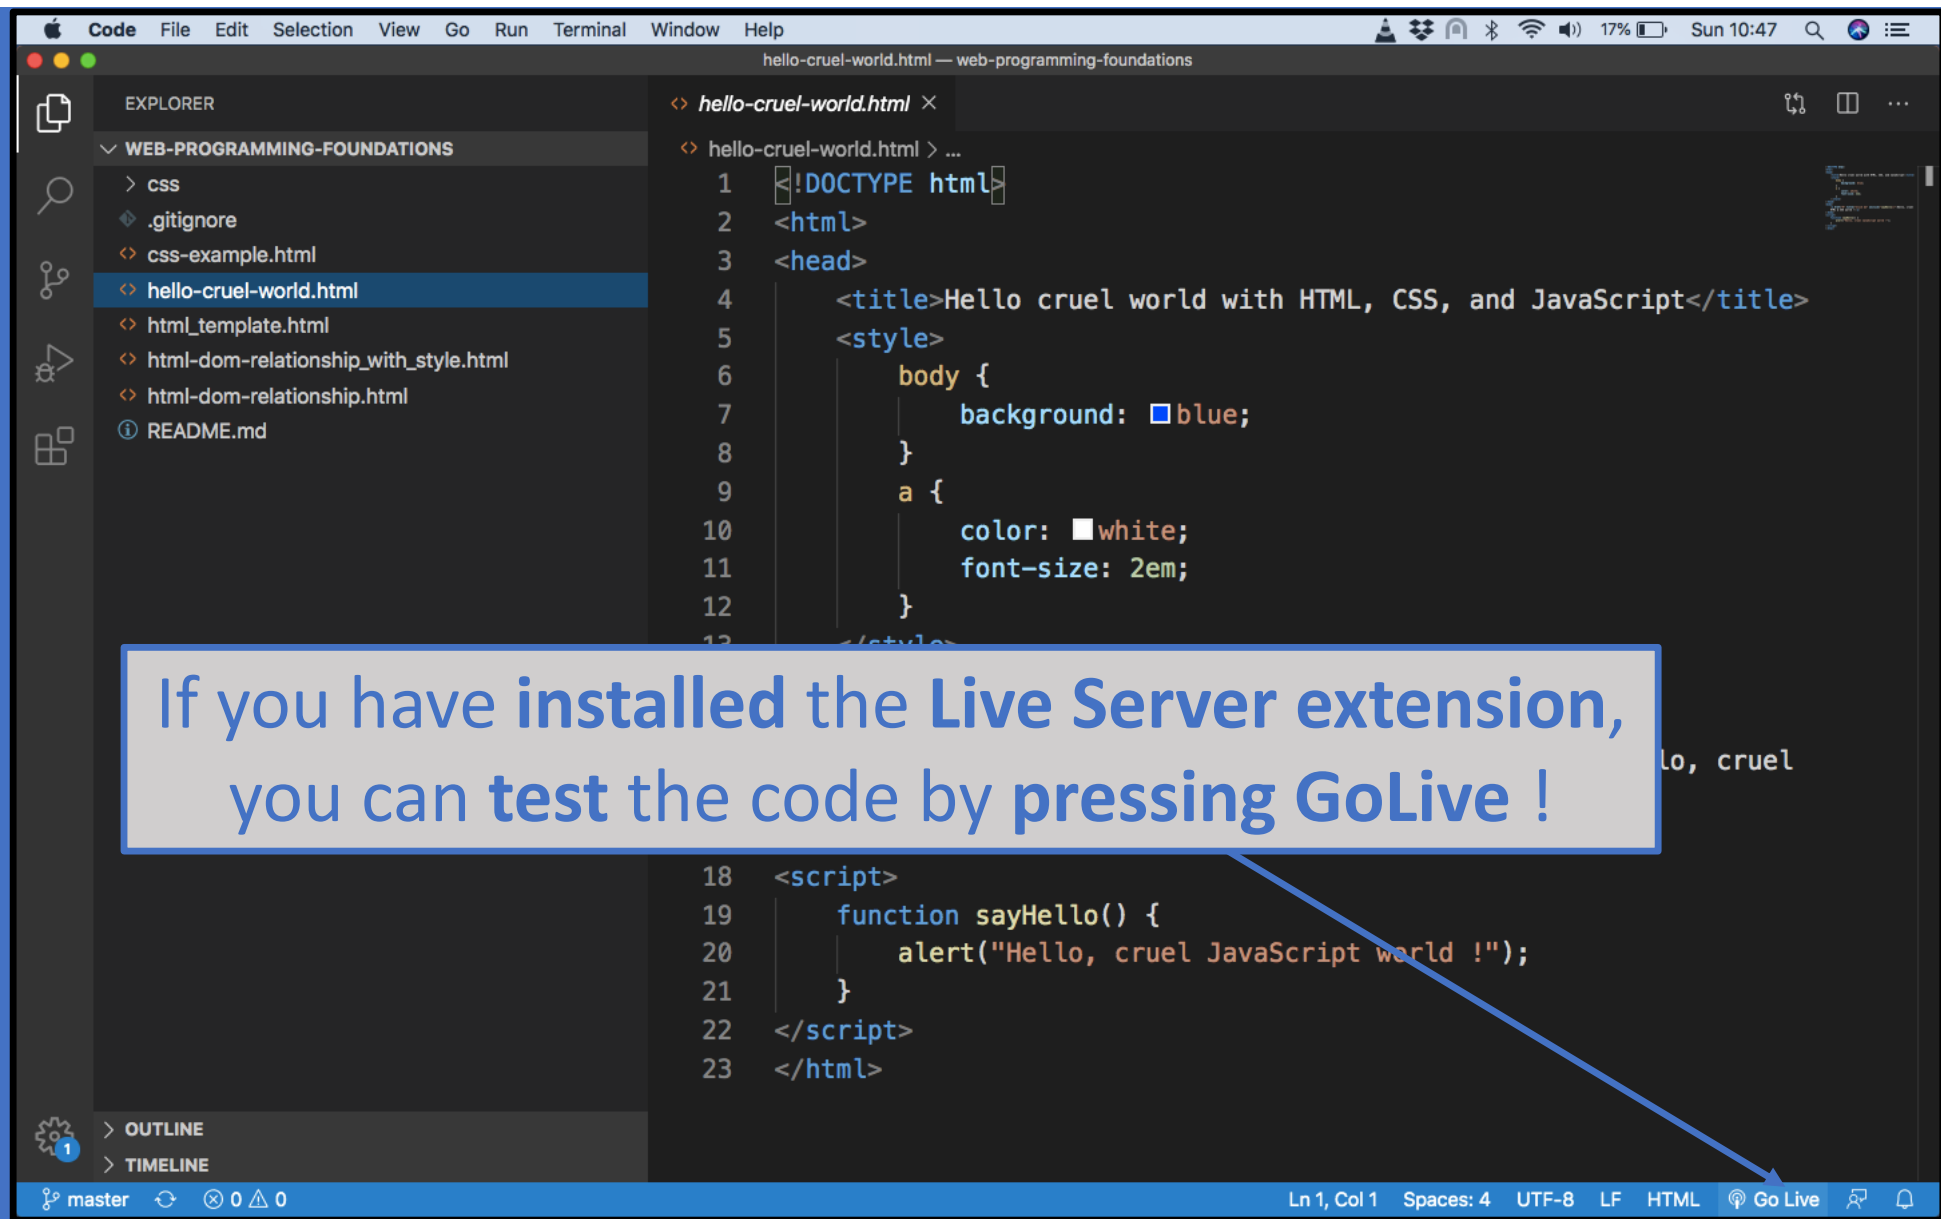

Open File or Folder ⌘ O

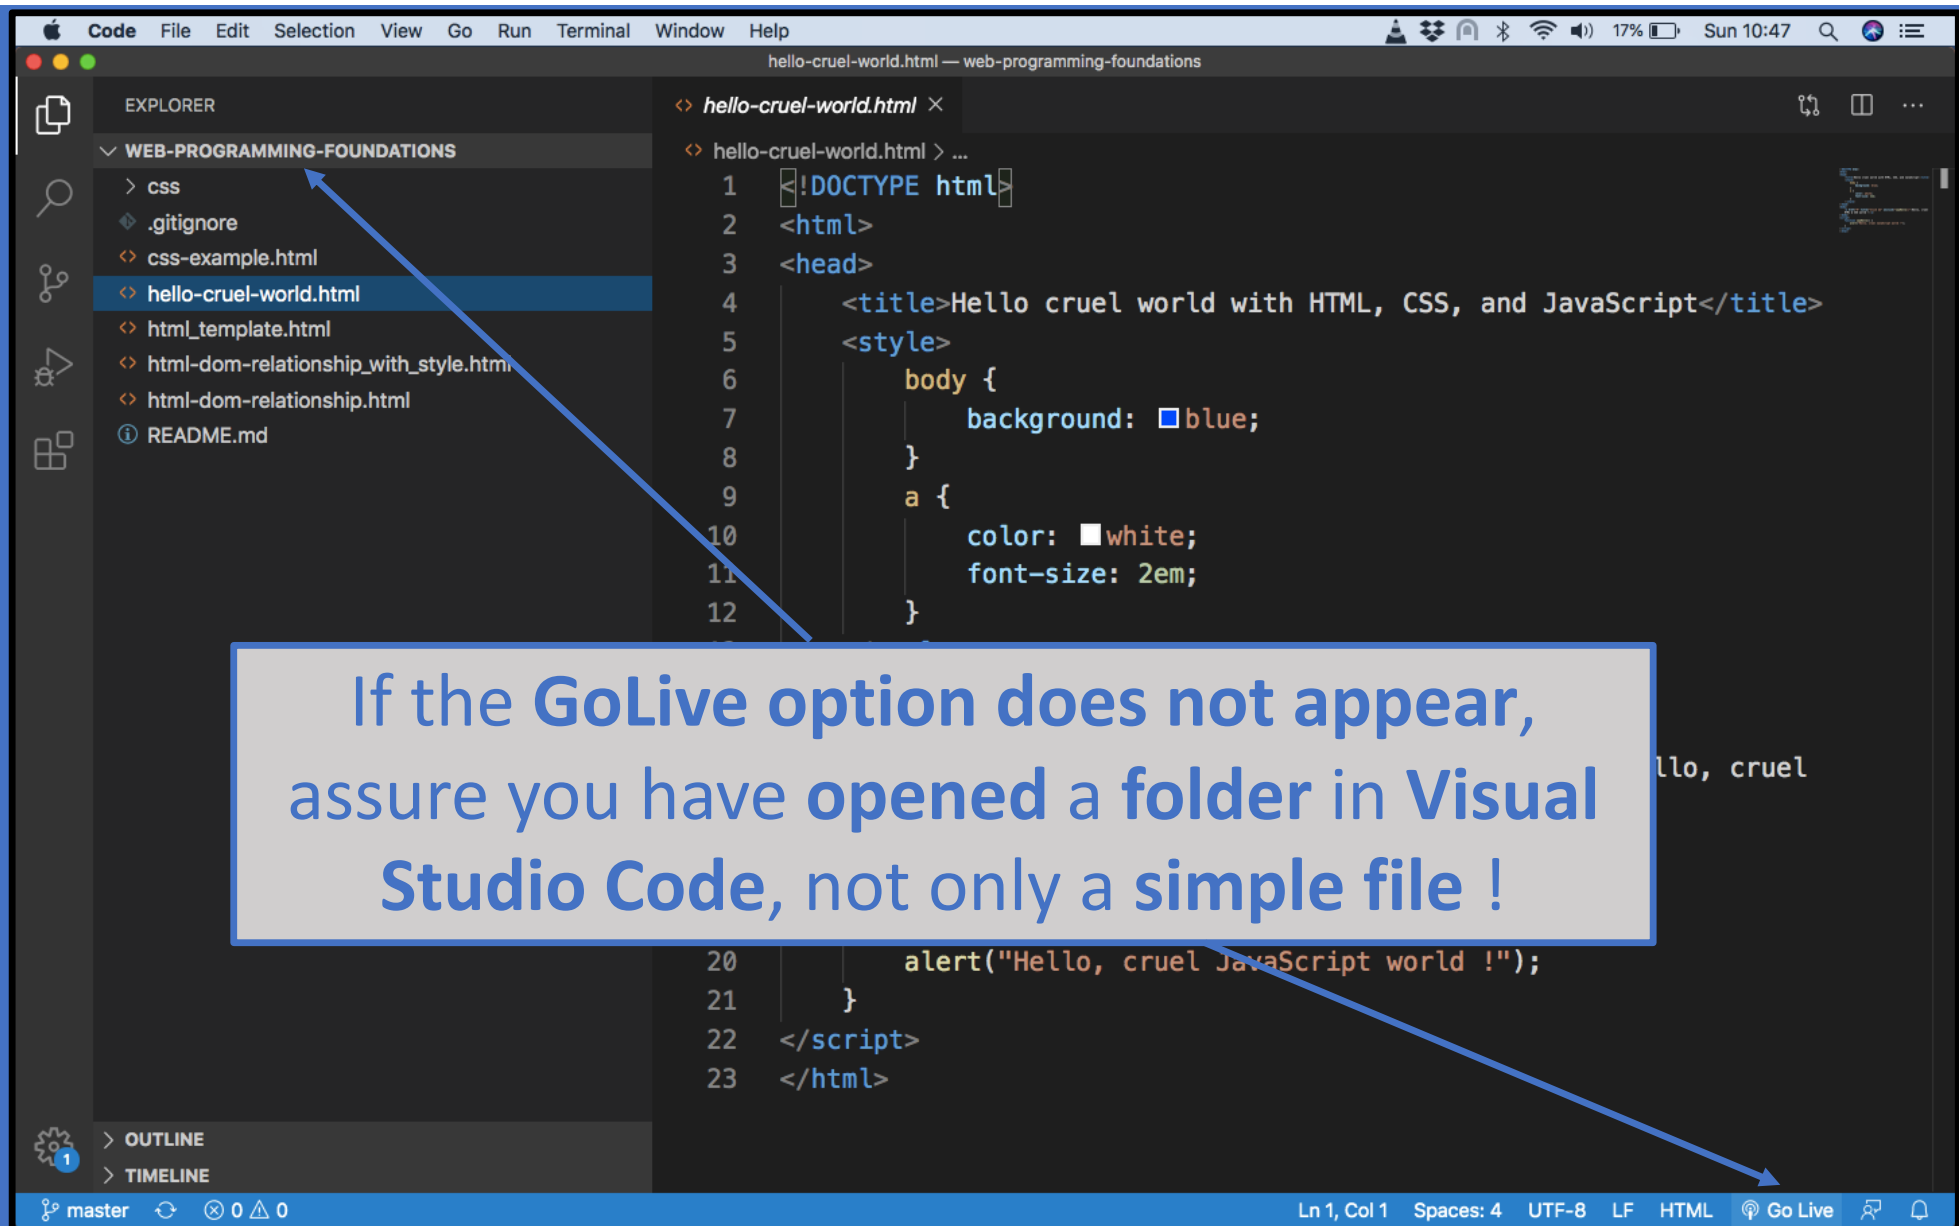

Open Recent ⌘ R

New Untitled File ⌘ N

Hello, cruel HTML & CSS world !

If you see this page after clicking Go live,
congratulations ! You are ready to use the
source-code files for this **course**.
