Introduction to WordPress

Changing the language of your website

Changing the language of Your website

The site we created has been configured to show the **Admin Panel** in **American English**. You can choose to set your Admin Panel to display content in any of the **180 different languages** and **locales** supported by **WordPress**.

The choice here defines the language displayed in the Admin Panel and **ALSO** on the **front end**, so if you choose **American English** like me, search engines and **web browsers** will recognize your published content as **American English** even if it's written in some other language like **Brazilian Portuguese**.

Dashboard

Welcome to WordPress!
We've assembled some links to get you started: Dismiss

Therefore, it's important to set the site language to the actual language used when content is published to the front end. Select Settings -> General

View your site Learn more about getting started

Site Health status Good

Writing Looking good, but there are still some things you can improve performance and security.

Reading Items on the [Site Health screen](#).
