

Web Programming

Rodrigo Martins Pagliares

WordPress

Introduction to WordPress

WordPress, wordpress.org & wordpress.com

Lecture: WordPress, wordpress.org & wordpress.com

Module: Introduction to WordPress

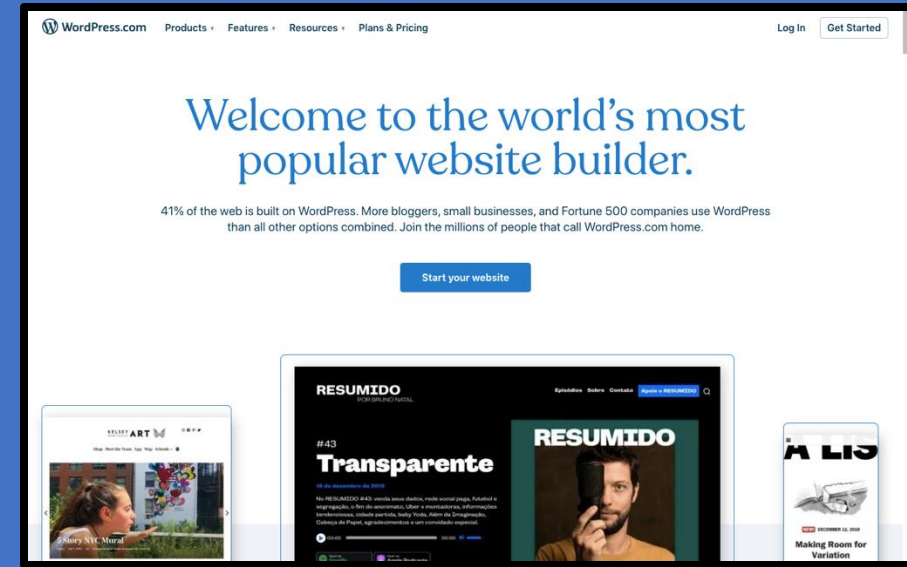

WordPress, wordpress.org, wordpress.com

wordpress.org

WordPress
software

wordpress.com

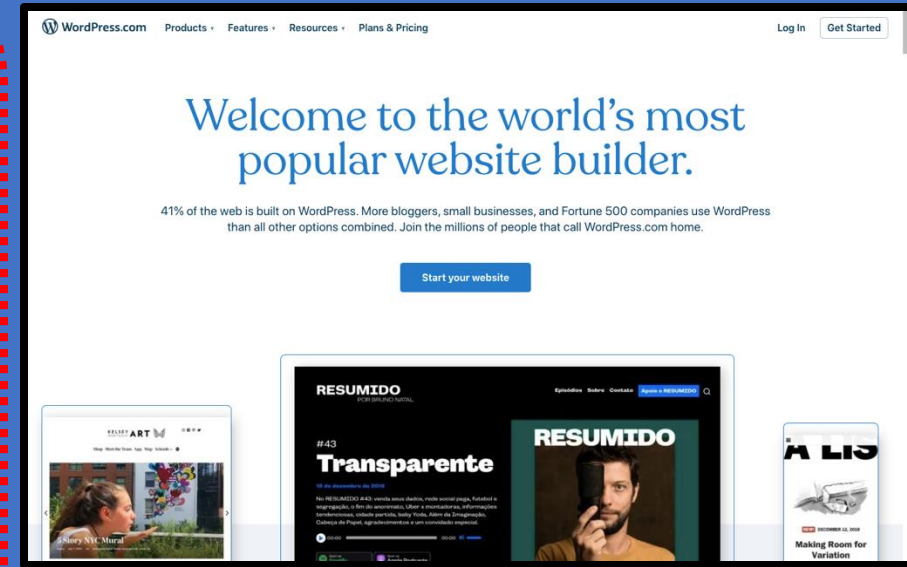

The focus of this course

wordpress.org

WordPress
software

wordpress.com

WordPress

WordPress

- Free, open-source web publishing application.

wordpress.org

wordpress.org

- The official website for the WordPress project.
- The place to go if you want to download WordPress to develop your websites locally.
- Place where you can ask questions on several forums.

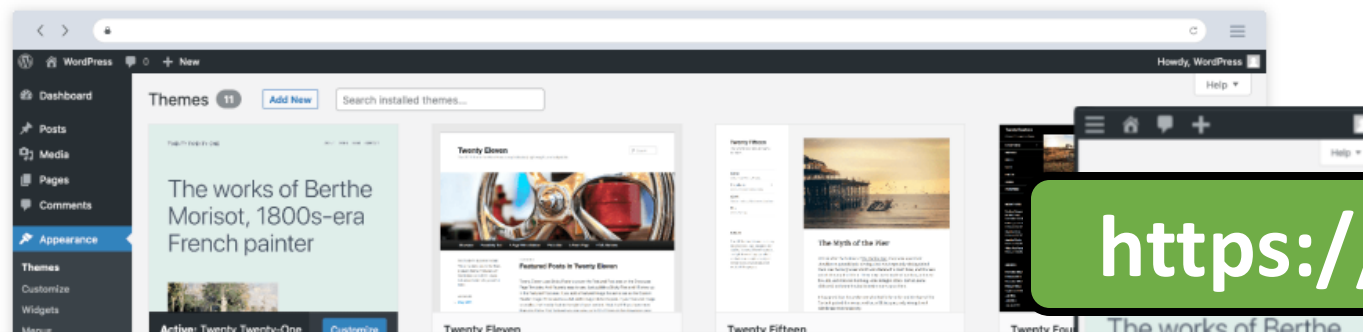

<https://wordpress.org>

Meet WordPress

WordPress is open source software you can use to create a beautiful website, blog, or app.

WordPress também está disponível em [Português do Brasil](#).

Beautiful designs, powerful features, and the freedom to build anything you want. WordPress is both free and priceless at the same time.

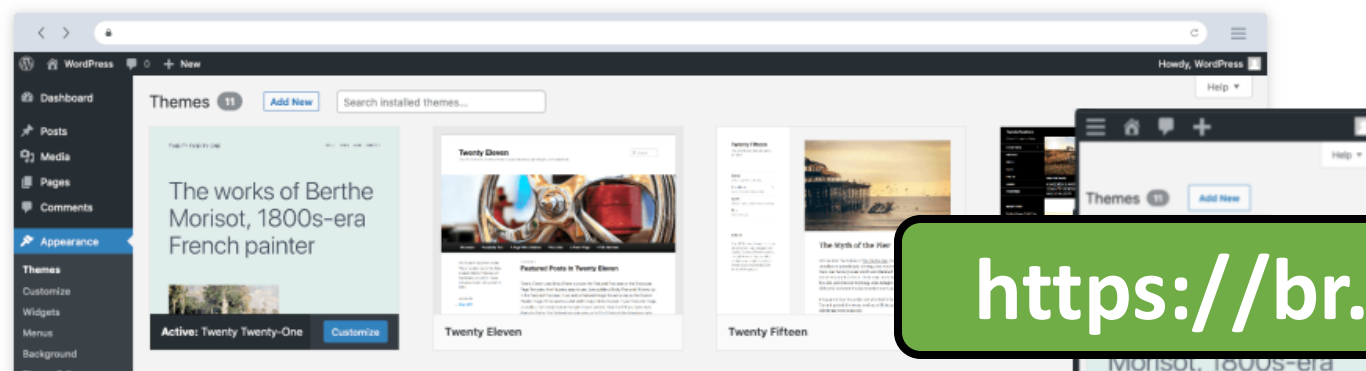

<https://wordpress.org>

Conheça o WordPress

O WordPress é um projeto de código aberto que você pode usar para criar sites, blogs ou aplicativos.

You can choose the **brazilian portuguese version** if you prefer.

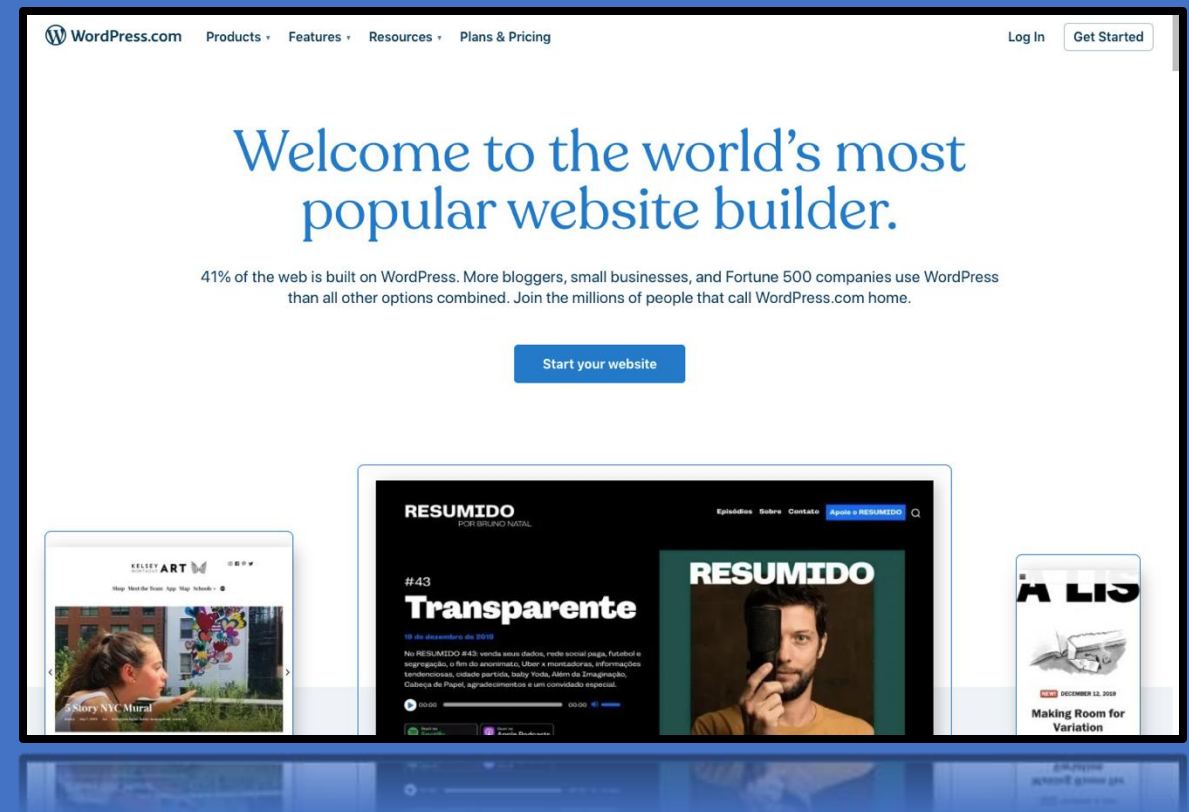

<https://br.wordpress.org>

wordpress.com

wordpress.com

- A hosting site for WordPress as a SaaS offering.

<https://wordpress.com>

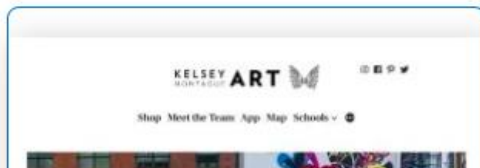

Welcome to the world's most popular website builder.

41% of the web is built on WordPress. More bloggers, small businesses, and Fortune 500 companies use WordPress than all other options combined. Join the millions of people that call WordPress.com home.

Start your website

How does WordPress work?

Lecture: How does WordPress work?

Module: Introduction to WordPress

WordPress is a web publishing application.

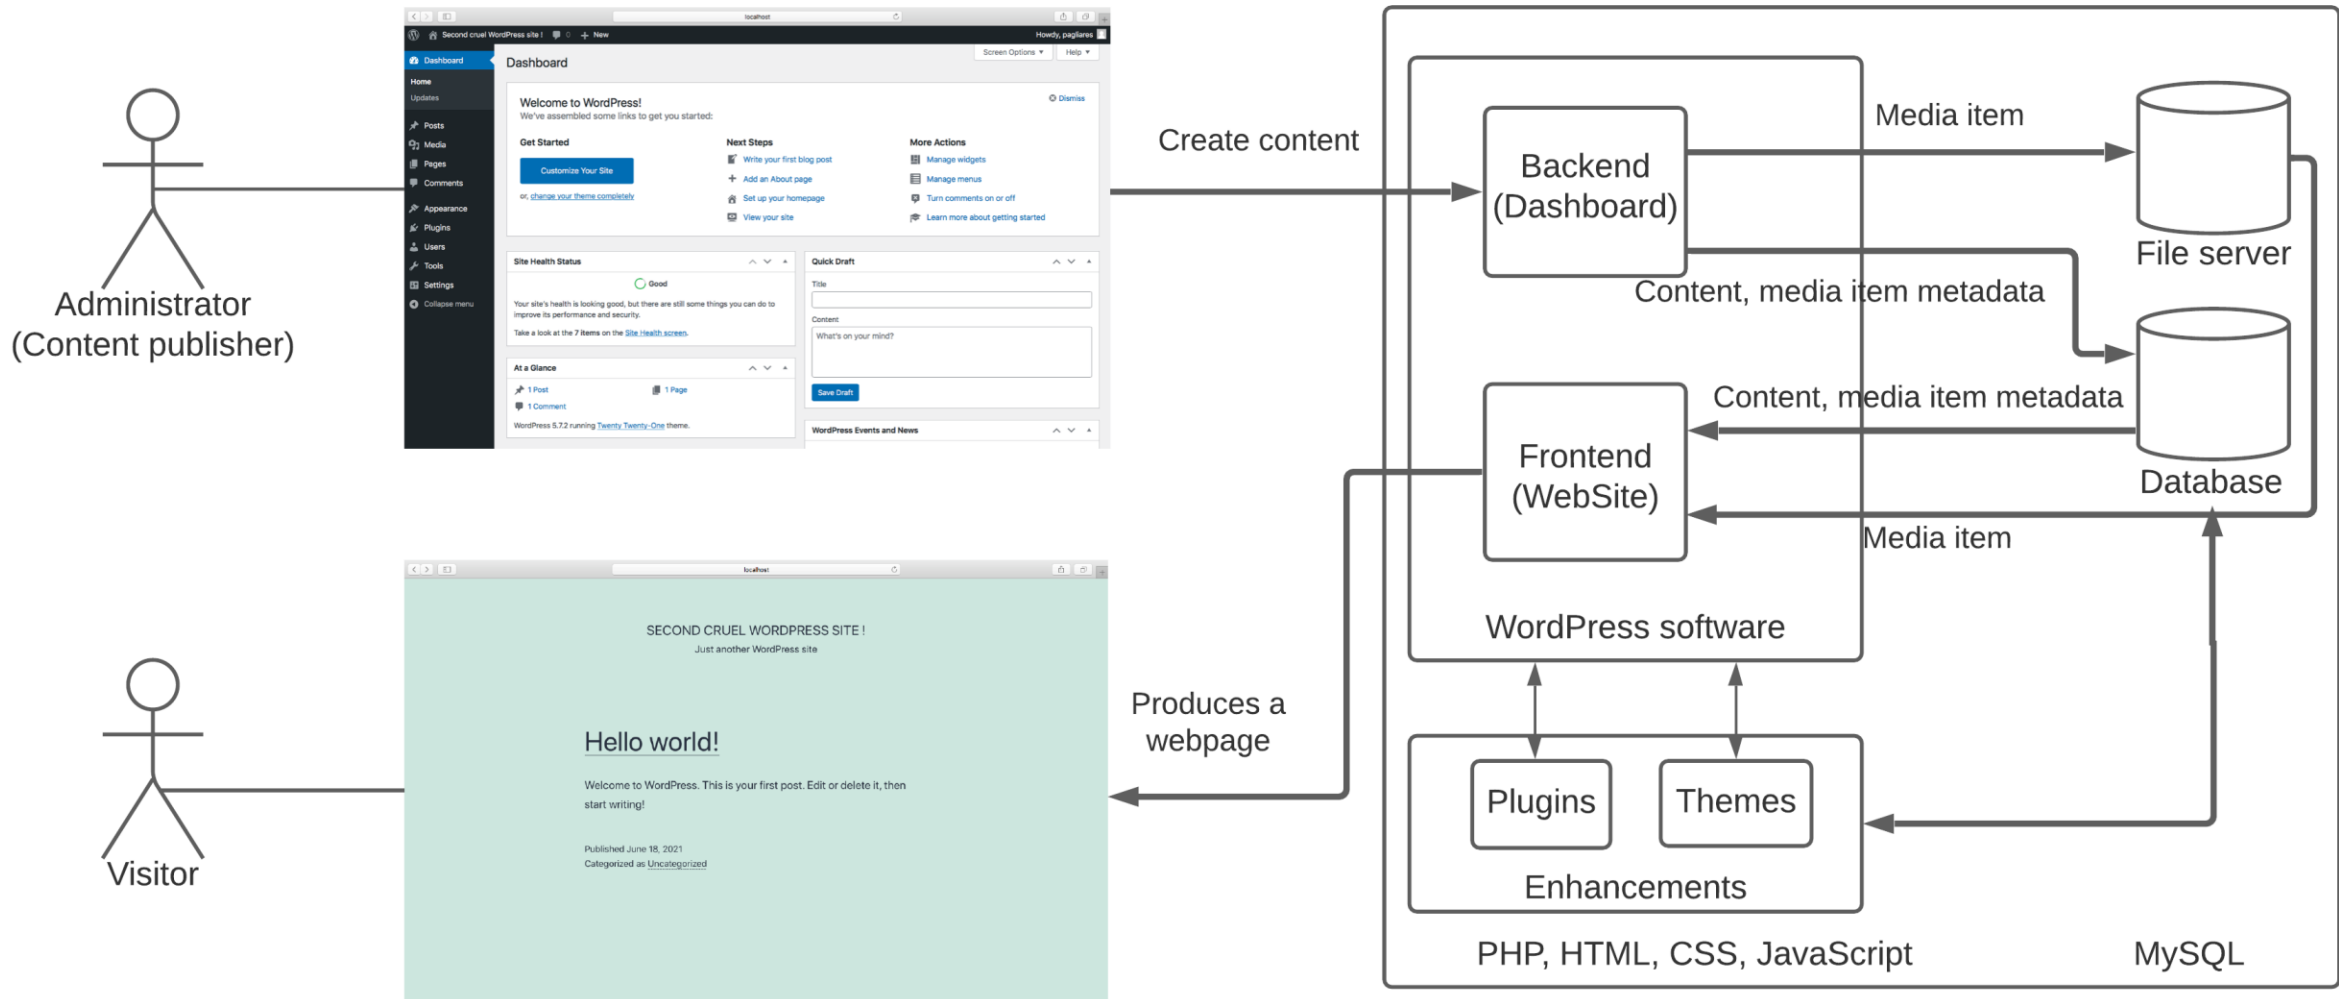

(This means you can use **WordPress** to **publish** content onto the **web**).

Types of content in WordPress

- We can create 3 types of content in WordPress:
 1. Posts
 2. Pages
 3. Media elements.
- Each type has its own unique properties.

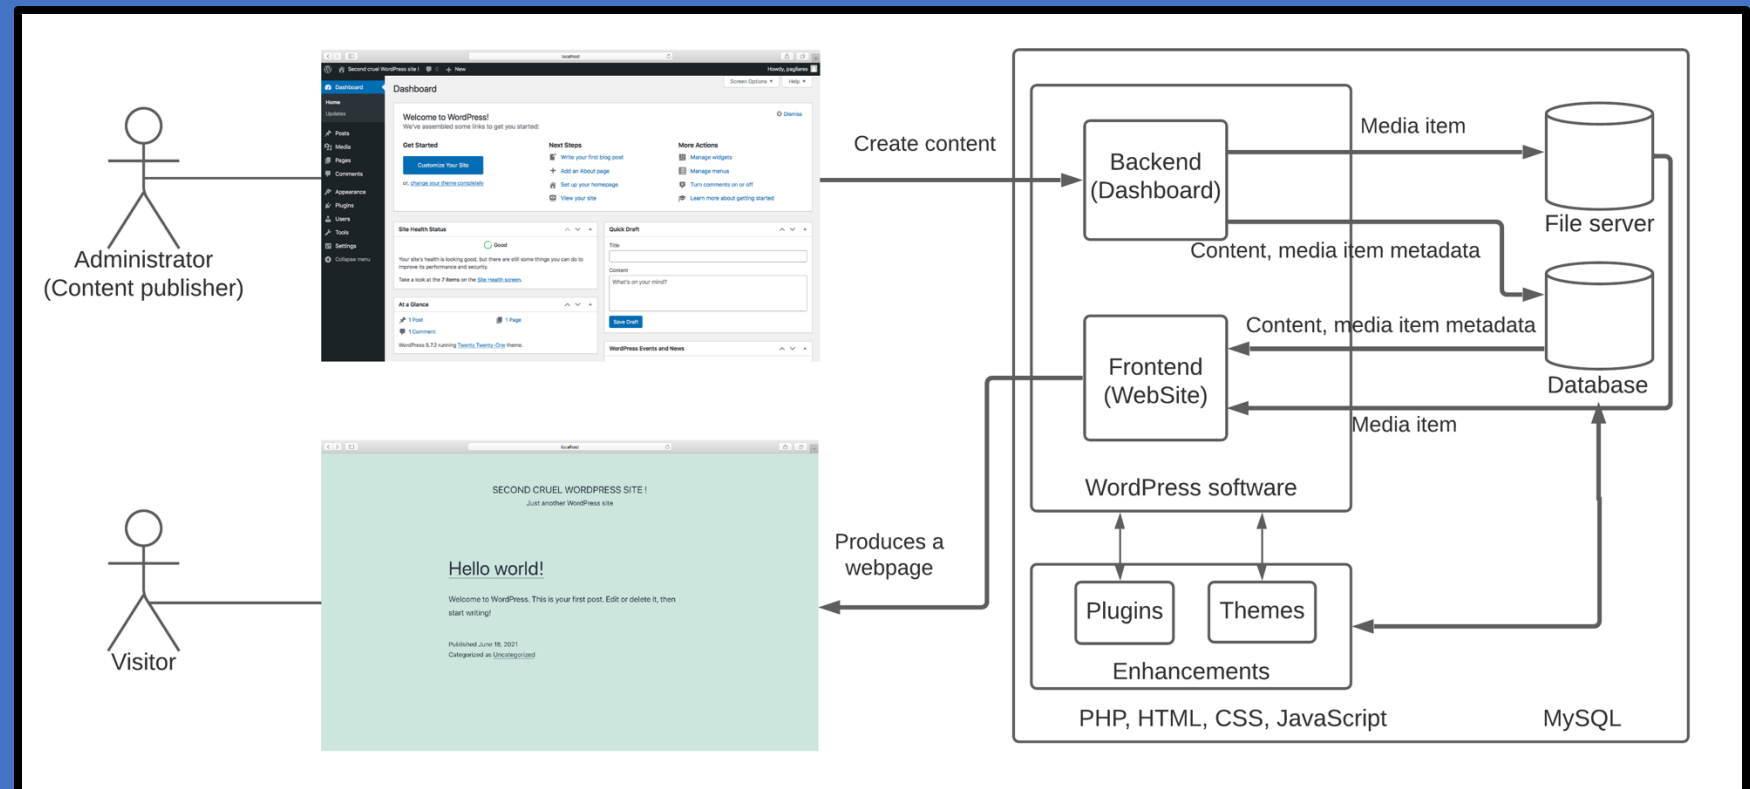

Main WordPress workflow

When you use **WordPress** to **publish content** on the **web**, you're really **just creating a database entry**.

A webpage in WordPress is a notion that gets realized dynamically by merging content from a database with a theme and plugins.
