Multimedia and embedding

We've looked at a lot of text so far in this course, but the web would be really boring only using text. Let's start looking at how to make the web come alive with more interesting content! This module explores how to use HTML to include multimedia in your web pages, including the different ways that images can be included, and how to embed video, audio, and even entire webpages.

Looking to become a front-end web developer?

We have put together a course that includes all the essential information you need to work towards your goal.

[Get started](#)

Prerequisites

Before starting this module, you should have a reasonable understanding of the basics of HTML, as previously covered in [Introduction to HTML](#). If you have not worked through this module (or something similar), work through it first, then come back!

Note

If you are working on a computer/tablet, you can use a code editor to create your own files, you could try out (or download) a code editor program such as [JSBin](#) or [Glitch](#).

Objective of the module

Objective: This **module** explores how to use **HTML** to include **multimedia** in your **web pages**, including the different ways that **images** can be included, and how to **embed video, audio**, and even entire **webpages**.

Lectures in this module

1. Images in HTML.
2. Video and audio content.
3. From object to Iframe – other embedding technologies.
4. Adding vector graphics to the Web
5. Responsive images.

Images in HTML

Lecture: Images in HTML
Module: Multimedia and embedding

Video and audio content

Lecture: Video and audio content
Module: Multimedia and embedding

From object to iframe: other embedding technologies

Lecture: From object to iframe: other embedding technologies
Module: Multimedia and embedding

Adding vector graphics to the Web

Lecture: Adding vector graphics to the Web
Module: Multimedia and embedding

Responsive images

Lecture: Responsive Images
Module: Multimedia and embedding

Assessments in this module

1. Mozilla splash page

- ✓ We'll **test** your **knowledge** of some of the **techniques** discussed in this **module**, getting you to **add** some **images** and **video** to a **funky splash page** all about **Mozilla**!

Assessment: Mozilla splash page
